Here's how these questions can be organized by chapter:

---

1. Histamine

Short Essay

1. Second generation antihistamines

2. Compare and contrast first generation with second generation antihistamines

3. Levocetirizine

4. Fexofenadine

Short Note

1. Betahistine – its mechanism of action and one use

Short Answer

1. Role of Cinnarizine in Meniere’s disease

2. Role of diphenhydramine in Parkinson disease

3. Role of promethazine in motion sickness

---

2. Serotonin and Migraine

Short Essay 5. Serotonin agonists used in therapy

Short Note 2. Name 3 serotonin antagonists 3. Role of calcium channel blocker in migraine prophylaxis 4. Name 3 drugs used in acute attack of migraine 5. Name 3 drugs used in prophylaxis of migraine

Short Answer 9. Name 2 drugs used in acute attack of migraine

---

3. Prostaglandins, Leukotrienes, and Platelet Activation

Short Essay 6. Prostaglandin analogues – uses with examples

Short Note 7. Low dose aspirin in myocardial infarction 8. Aspirin should be stopped 1 week before surgery 9. Aspirin should be avoided in pregnancy

---

4. NSAIDs

Long Essay

1. Enumerate non-steroidal anti-inflammatory drugs. Explain the mechanism of action, uses, and adverse effects of aspirin.

Short Essay 7. Selective COX-2 Inhibitors 8. Compare and contrast aspirin with paracetamol 9. Shared beneficial and adverse effects of aspirin 10. Ibuprofen 11. Aceclofenac

Short Note 6. Paracetamol 10. Treatment of salicylate poisoning 11. Treatment of paracetamol poisoning

Short Answer 4. Name 2 topical uses of salicylates 5. Name 2 selective COX-2 inhibitors 6. Aspirin in ductus arteriosus 7. Aspirin is avoided in children with viral fever 8. Mechanism of NSAID-induced peptic ulcer and a drug to treat it

---

5. Rheumatoid Arthritis and Gout

No specific questions were listed under this chapter in the provided list.
